

FILE MANAGMENT SOLUTION FOR IMPROVED COLLABORATION EXPERIENCE

PlugDISK 3

GLUESYS

Transform your working environment with PlugDISK 3 to enhance your collaboration experience.

CENTRALIZED BUSINESS DATA

Centralize business data with dedicated user and group disks, ensuring efficient data management and accessibility

COLLABORATION ENVIRONMENT

Provide an effective collaboration environment by assigning user and group permissions for each shared folder

CONVENIENT ACCOUNT MANAGEMENT

Streamline organizational structure and account management by integrating with the HR database

SECURE DATA TRANSMISSION

Prevent data breaches with SSL encryption during transmission, ensuring secure and protected data exchange

SEAMLESS USER EXPERIENCE

Support for Windows Explorer and web browsers ensures a familiar environment, maintaining consistency with existing user interfaces

LOG MANAGEMENT & USAGE STATISTICS

Provide logs and usage reports for all activities, ensuring comprehensive log management and insightful usage statistics

WHY YOU SHOULD CHOOSE PLUGDISK 3

NAS-BASED STORAGE SPACE

Deliver stable file storage solution from Linux-based embedded OS, ensuring reliability and efficiency

SEAMLESS SYSTEM OPERATION

Unparalleled system stability through redundancy, backup and remote replication, ensuring operational continuity

SE SPECIALISTS

Top-level technical support experience from our in-house developers

SECURE DATA INTEGRATION

Centralized File Management

Automatically allocate dedicated disk for each user to centralize and manage all business files created within the company are stored and managed centrally on the PlugDISK, preventing the loss of critical business assets.

File Versioning

You can manage files stored on the PlugDISK by version according to when they were modified. Even if a problem occurs while using the solution, such as a file being accidentally deleted or incorrectly modified when shared with other users, you can easily return the file to its previous state.

EFFICIENT COLLABORATION

Sharing and Collaboration

Create shared disks for each department and group based on the organizational structure to facilitate smooth business collaboration among users. Each shared disk can be assigned with permissions for each user, department, or group to ensure a more secure and efficient collaborative environment.

Enhanced Collaboration Features

We offer a range of advanced collaboration features, including Link Mail for sending file links by email, sub-sharing that allows you to re-share specific folders in a shared disk to particular groups and users, and data migration that allows you to transfer a specific user data to another user or to a shared disk.

Seamless User Experience

PlugDISK 3 is available as a virtual network drive, so you can use it as your own local drive in Windows Explorer. Additionally, it is compatible with various web browsers through a dedicated web explorer, supporting multiple languages including Korean, English, and Chinese.

FLEXIBLE MANAGEMENT ENVIRONMENT

Detailed Usage Monitoring

You can monitor detailed usage statistics for each user, group, or shared disk. Administrators can utilize this monitoring feature to gain insights into PlugDISK usage, enabling efficiency for management of storage resources, such as storage allocation and disk management.

Convenient Account Management

Automate the management of organizational charts and account information through batch integration with the HR database. Enable One Pass Login with Single Sign-On (SSO) integration for streamlined access.

Efficient Administration

Easily configure service policy restrictions using our intuitively designed management menu. To enhance efficiency and distribute administrative workload, you can designate additional shared managers alongside the main administrator responsible for overall service management.

ENHANCED SECURITY AND STABILITY

Secure Data Transmission

Ensure all data transmitted via the web is encrypted with SSL (Secure Sockets Layer) to prevent data breaches. Even if data is intercepted during transfer, encryption prevents unauthorized access.

Diverse Security Solutions

PlugDISK offers integration with a variety of security-focused solutions such as media control, backup solutions, and DRM solutions (AnySecurity), allowing you to build a system optimized for your business environment and requirements.

Activity Log Tracking

Provide detailed logs of all activities on the centralized storage, PlugDISK. Track user IDs, access IPs, actions, and timestamps for thorough auditing and traceability.

BENEFITS FOR IMPLEMENTING PLUGDISK 3

ENHANCED INTERNAL DATA SECURITY

Data generated on the user's PC is stored directly in central storage to prevent external leakage of business assets.

IMPROVED WORK EFFICIENCY

Maximize work efficiency through a convenient collaboration environment and friendly user interface.

REDUCED TCO

By providing capacity-based licensing, there are no additional licensing costs when increasing users.

ONE-POINT TECHNICAL SUPPORT

Installation and integrated maintenance services with our all-in-one hardware and software solution.
