

Cloud & Enterprise Servers

SupremeRAID™ SR-1010

The Best Solution for NVMe RAID: SupremeRAID™ is a software-defined RAID solution on a GPU, designed to deliver maximum SSD performance without consuming CPU cycles or creating throughput bottlenecks. Out-of-path RAID protection technology means data travels directly from the CPU to deliver unmatched flexibility, unprecedented NVMe/NVMeoF performance, and overall superior value.

Supports up to 32 SSDs

Protecting NVMe-based Data From The Cloud To The Desktop: SupremeRAID™ SR-1010 is a PCIe Gen 4 card that supports up to 32 SSDs, and delivers superior performance and flexibility for cloud and enterprise servers. SupremeRAID™ SR-1010 is the perfect storage choice for enterprise data centers, broadcast outlets, studios, CSPs, MSPs, research, oil & gas, and HPC. Its powerful performance capabilities are well suited for applications such as AI/ML, databases, Fintech (High Frequency Trading), streaming media, 4K and 8K video, as well as any performance-hungry application.

SR-1010 Software Specs

Supported RAID levels:

RAID 0, 1, 5, 6, 10

Max Physical Drives: 32

Max Drive Groups:

Linux: 8 / Windows: 4

OS Support:

AlmaLinux 8

CentOS 7 / 8

Debian 11

openSUSE Leap 15

Oracle Linux 7 / 8 / 9

SLES 15

RHEL 7 / 8 / 9

Rocky Linux 8

Ubuntu 20.04 / 22.04

Windows Server 2019 / 2022

Windows 11

Max Virtual Drives per Drive Group:

Linux: 1023 / Windows: 8

Max Drive Group Size:

Defined by physical drive size

Supported NVMe SSDs:

Dapustor, Hagiwara, Kingston Technologies, KIOXIA, Memblaze, Micron, Phison, Samsung, Scaleflux, Seagate, Solidigm, Western Digital

Supported Platforms:

AMD, ARM, Intel

Supported Virtualization Environments:

KVM, Proxmox VE, Virtuozzo OpenVZ, VMWare Workstation Pro 17, Windows Server Hyper-V

SR-1010 Card Specs

Host Interface:

x16 PCIe Gen 4.0

Max Power Consumption:

70 W

Form Factor:

2.713" H x 6.6" L, Dual Slot

Product Weight:

306 g

Flexible & Future Ready

Unmatched flexibility with features like new O/S support, compression, encryption, thin provisioning, or boot drive protection can be easily added with software releases

World Record Performance

Unprecedented NVMe/NVMeoF performance up to 28M IOPS and 260GB/s throughput with a single SupremeRAID™ card delivers the full value of your server investment

Highly Scalable

Easily manage 32 direct attached NVMe SSDs; extend data protection without sacrificing performance with Software Composable Infrastructure

Plug & Play

Effortless installation, no cabling or motherboard re-layout required; direct connect to SSD without PCIe switches

Free Up CPU Resources

Offload your entire RAID computation to SupremeRAID™ to free-up CPU computing resources for 5G, AI, and AIoT applications

Easy to Use

SupremeRAID™ doesn't rely on memory caching technology, eliminating the need for battery backup modules

“We’re perpetually impressed with the extreme storage performance SupremeRAID™ enables. For maximizing NVMe SSD performance, we haven’t seen anything on the market that can touch the SupremeRAID™ Gen5 solution. It’s fantastic, plus we’re doing the work on an inexpensive NVIDIA A2000 GPU.”

“Gone are the days of IO bottlenecks... SupremeRAID™ is the perfect platform for AI/ML, IoT, video processing, and other performance-hungry applications.”
